

Soo Yun Kim

Software Engineer

Performance-driven Software Engineer with **5 years of experience** designing and scaling mission-critical enterprise applications. Expert in **C#/.NET and MSSQL**, with a strong background in **high-volume transactional data** and **RESTful microservices** architectures. Proven track record of maintaining **99.9% system availability** through proactive optimization and **CI/CD-driven DevOps** practices within **Agile SDLC** environments.

WORK EXPERIENCE

Software Engineer | LG CNS Canada | Windsor, ON May 2024 – June 2025

- Designed, enhanced, and maintained **large-scale C#/.NET** enterprise applications supporting high-volume transactional data in live production environments.
- Performed root-cause analysis, debugging, and performance tuning for mission-critical systems, consistently maintaining **99.9% availability** and resolving production incidents within **5 minutes**.
- Developed and maintained **RESTful APIs** integrating MES/WMS platforms with upstream and downstream enterprise systems.
- Improved database performance and scalability by implementing **advanced MSSQL indexing** strategies, significantly reducing query latency and eliminating data bottlenecks.
- Took ownership of WMS production systems on short notice, achieving **two consecutive months of zero downtime** through rapid system onboarding and proactive monitoring.
- Collaborated in Agile SDLC environments using JIRA and Confluence for release planning, incident tracking, and documentation.

Tech Stack: C#, .NET Core, WPF, MSSQL, REST APIs, MES/WMS Integration, Visual Studio, JIRA

Software Engineer | Navien | Seoul, South Korea September 2022 – February 2024

- Designed and implemented enterprise applications by integrating **C#/.NET and Java/Spring** backend services with JavaScript-based frontend interfaces.
- Designed and implemented **batch-processing data pipelines** using MSSQL stored procedures, stabilizing cross-platform system integrations and eliminating recurring operational downtime.
- Developed and optimized RESTful APIs and microservice-style components to support **ERP (SAP)–CRM integrations** and logistics platforms.
- Conducted large-scale MSSQL data analysis and modeling to support business operations, planning systems (S&OP), and cross-department reporting requirements.
- Improved system performance and user adoption by refactoring UI components and optimizing backend processing logic, increasing active user adoption from **30% to 90%** on a Java/Spring-based logistics tracking platform.
- Reduced annual licensing costs by approximately **20M KRW** by identifying inactive users and automating account deactivation through Oracle SQL–based user lifecycle management.
- Deployed and maintained applications in **AWS environments** (EC2, S3, CloudFront, Route 53), supporting scalable and secure service delivery.
- Participated in **CI/CD pipelines** and **Agile** development processes, collaborating with stakeholders to estimate effort, prioritize requirements, and deliver high-quality releases.

Tech Stack: C#, .NET Framework (ASP.NET), Java, Spring MVC, JavaScript, MSSQL, Oracle, AWS, SAP Integration, VBScript, REST APIs, CI/CD, JIRA, Confluence, GitLab, Linux, Visual Studio, Eclipse

Software Developer | GL | Daegu, South Korea June 2020 – August 2022

- Developed and maintained **C#/.NET desktop applications** for clinical and enterprise environments, focusing on system reliability and data accuracy.
- Designed and implemented **relational database schemas** and managed application data using MariaDB.
- Engineered a **TCP/IP-based data transmission system** supporting multi-month production usage with **zero data loss or synchronization errors**.
- Conducted application testing, debugging, and performance optimization to improve system stability and user experience.
- Produced and maintained technical documentation supporting system enhancements and long-term maintenance.

Tech Stack: C#, .NET Framework (WPF, WinForms), C++, MariaDB, Socket Programming (TCP/IP), SVN, Visual Studio

TECHNICAL SKILLS

- Languages:** C#, Java, JavaScript, Python, C++, HTML, CSS, VBScript
- Frameworks:** .NET (Core, Framework, ASP.NET, WPF, WinForms), Spring Boot, Spring MVC, React
- Databases:** MSSQL, MariaDB, Oracle
- Data Management:** Stored Procedures, Data Modeling (ERDs), Batch Processing, Data Mapping
- Cloud:** AWS (EC2, S3, CloudFront, Route 53)
- APIs & Integration:** RESTful APIs, JSON, XML
- DevOps:** CI/CD Pipelines, GitLab CI/CD, Docker
- Tools:** Git, SVN, JIRA, Confluence, Visual Studio, Eclipse
- Domain Expertise:** Enterprise Systems (MES, CRM, WMS, S&OP, Groupware), System Integration, Incident Resolution, Root-cause Analysis, Workflow Optimization

EDUCATION

- B.S. University of Washington Bothell**
Computer Science & Software Engineering
- A. A. Shoreline Community College**
